

Amendments to the Specification:

Please amend the specification as follows:

Please replace paragraph starting at page 11, 2nd paragraph, with the following rewritten paragraph:

A resin door can be used for the holding door 8, but it is preferable for the holding door 8 to ~~use~~ be a metal door. Reference numeral 35 denotes the direction of vehicle width.

Please replace paragraph starting at page 13, 1st paragraph, with the following rewritten paragraph:

The strength in the vicinity of the hinge portion 11 of the door body portion 9 can be selectively improved especially by crossing the lateral bead ~~24~~ 23 and the longitudinal bead ~~23~~ 21 in the vicinity of the hinge portion 11. Therefore, the damage in the vicinity of the hinge portion 11 at the time of expanding the airbag body 6 can be prevented (reference to FIG. 4C).

Please replace paragraph starting at page 13, 3rd paragraph, with the following rewritten paragraph:

Furthermore, the strength of the door body portion 9 can be further enhanced by constricting the longitudinal beads 21 and the lateral beads ~~23~~ 22 and 23 to be the lattice form. An installation point is definitely disposed in the portion, where the strength is enhanced, by forming the installation portion (hole 16) to the boss 15 inside the lattice form.
